WORK EXPERIENCE

- 2022 - 2023 Web developer at Programa Água Doce (PAD), in the state of Paraíba, Brazil. Developed the front-end of the website using React.js and the back-end using Node.js, as well as a mobile app using React Native. The website includes several CRUDs related to users and desalination plants. The website uses open source libraries such as leaflet.js to display a map showing each of the desalination sites in the PAD program.
- 2019 - 2020 Member of the Brazilian team of the SMART -Control Consortium. Contributed to risk management studies and conducted fieldwork and data analysis for the implementation of a controlled groundwater recharge pilot project in Brazil; website: <https://smart-control.inowas.com/>
- 2017 - 2019 Instructor for an advanced Excel course. Taught Excel to small groups in various contexts (for a private company, for local and national events)
